

DECOKRIL WATERPROOF W

Transparent water-repellent liquid for protection of exterior walls, limiting water penetration for a long time without modifying the appearance of the surface. It can be applied to concrete, mortar, brick, natural stone, fibre cement, etc.

Features:

- ✓ Reduces the formation of efflorescence, fungus and algae, etc.
- ✓ Breathable.
- ✓ Waterproof.
- ✓ Does not modify the appearance of the wall.
- ✓ Environment respectful.
- ✓ Odourless.
- ✓ Ready to use.

It is an invisible WATER-BASED REPELLENT to be applied to cement, brick or stone surfaces; it penetrates the surface pores and covers them internally with water-repellent material increasing the durability of the structure.

It contains very small particles to penetrate and deeply impregnate the substrate with without changing the appearance of the surface of the surface.

Benefits of applying DECOKRIL WATERPROOF W?

- ✓ It protects the structure without changing its appearance.
- ✓ Reduces efflorescence and salt damage.
- ✓ Inhibits the growth of micro-organisms on the surface (moss, mosses, lichens, etc.)
- ✓ Prevents the deposit of contaminants (stains, dirt, etc.)
- ✓ Improves thermal insulation.
