

DECO-TILES

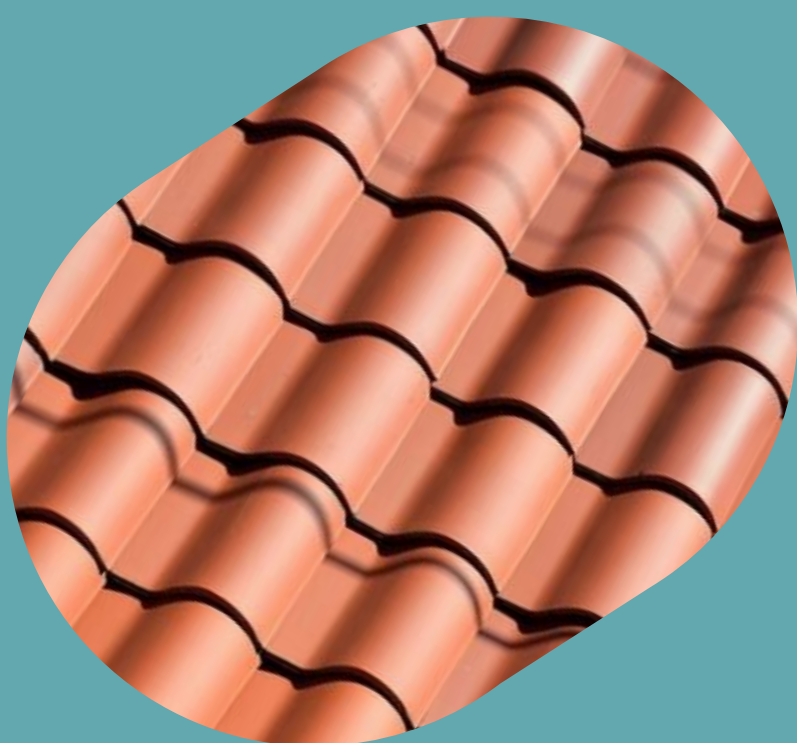

WATERPROOFING PAINT FOR ROOF TILES

Paint for the decoration and protection of roofs with porous ceramic roof tiles, slate, fibre cement, concrete, etc.

- Rainproof, protects the roof.
- Reduces efflorescence and salt damage.
- Inhibits the growth of microorganisms on the surface (verdigris, mosses, lichens, etc.).
- Prevents the deposit of contaminants (stains, dirt, etc.).
- Easy cold application by traditional methods.
- Able to accompany the expansion and contraction movements of the substrate without cracking.
- Water-based, non-toxic and non-flammable.

Benefits:

- Long lasting roof renovation.
- Good adhesion to a wide range of substrates (fibre cement, concrete, slate, etc.).
- Sealing and waterproofing of porous substrates.
- Excellent colour retention and UV protection (non-whitening, non-yellowing).
